PARDO 43

REDEFINING LUXURY

Since its debut as the first model in the Pardo lineup, the Pardo 43 has become an icon of yachting, exemplifying the essence of the walkaround concept. It masterfully combines performance, seafaring excellence, and unmistakable style, highlighted by its signature inverted bow.

The Pardo 43 also redefines the open boat philosophy, prioritizing agility and high-speed movement. Engineered for exceptional performance, the P43 features an IPS propulsion system and a specially designed deep-V hull, delivering unmatched stability, efficiency, and safety, even in challenging sea conditions.

The result is a yacht that is both distinctive and versatile, perfect for those who enjoy socializing at sea as well as those who seek a more intimate, tranquil experience.

The high level of customization available ensures that every owner can tailor the Pardo 43 to their unique preferences, making it a truly personal and extraordinary vessel.
